SUMMARY

Full-Stack Developer with 12+ years of hands-on experience delivering 10+ SaaS platforms, scalable web applications, WordPress solutions, and AI-powered automation systems. Specialist in PHP/Laravel with a strong track record delivering complex integrations — from payment gateways and video calling to AI chatbots, workflow automation, and technical SEO. Hands-on with React JS and Node.js, deploying on AWS (Ubuntu) with NGINX, and building real-time features with Pusher. Currently working with PlacidWay (a U.S.-based medical tourism platform), building AI-driven automation workflows with Dialogflow CX, n8n, and Make.com, alongside WordPress technical SEO, schema markup, and Core Web Vitals optimization.

SKILLS

Backend

PHP 8, Laravel, CodeIgniter, CakePHP, Node.js, REST APIs, Core PHP

Mobile

Cordova/PhoneGap, Ionic, React Native (basic)

Other Integrations

Pusher (real-time), Swedish BankID, Twilio (SMS, Voice/Calls, Video, WhatsApp Integration, Call Recording & Transcription), SendGrid, Intercom, Web Push, Google OAuth

EXPERIENCE

Senior Web Developer

Jun 2021 – Present

PlacidWay — Medical Tourism Platform (U.S.)

- Leading full-stack development on a global medical tourism SaaS platform serving international patients across 20+ countries.
- Building and maintaining a complex CakePHP backend with MySQL and REST APIs powering 15+ core platform modules.
- Integrating AI features including OpenAI and Dialogflow CX chatbots for lead handling, plus n8n and Make.com workflows automating internal business processes — cutting manual lead-handling time by an estimated 30%.

- Implemented Stripe payment flows, provider dashboards, and patient journey tracking for 100+ healthcare providers.
- Driving technical SEO initiatives: schema markup implementation, sitewide H1 tag audits and fixes across 300+ pages, and Core Web Vitals / LCP performance optimization — improving page load speed by up to 35% on a legacy PHP 5.6 codebase.
- Optimizing database queries and application performance for a high-traffic production environment serving 50,000+ monthly visitors.

Web Developer
Jan 2017 – Jun 2021

Simple Sign International AB (Sweden)

- Built and maintained an e-signing SaaS product used by 50+ businesses across Sweden and Scandinavia.
- Integrated Swedish BankID for legally binding digital signatures, processing 500+ signed documents monthly.
- Developed real-time collaboration features, audit trails, and workflow automation, reducing document turnaround time by an estimated 40%.
- Worked on Microsoft Teams integration and GymPass employee benefit modules used by 5,000+ end users.
- Owned the full stack across a 4-year tenure: Laravel backend, KnockoutJS frontend, MySQL data layer.

PHP Developer
Jan 2015 – Jan 2017

Textpress Media Group AB (Sweden)

- Developed and maintained 10+ web portals and CMS-driven news platforms.
- Built 20+ custom modules in CodeIgniter and core PHP.
- Handled front-end work with jQuery, Bootstrap, and HTML5/CSS3 across 10+ client projects.
- Started as an intern (Sep 2014) and converted to full-time within 4 months.

PROJECTS

Sharely (sharely.se) — Property & community association management platform (Sweden) — handles property/share records, boundaries, and land registry integration for housing associations — full-stack Laravel.

SupportRoom (supportroom.com) — Mental health platform — complex role-based access system.

The Mighty Roar (themightyroar.com) — Travel & volunteering platform (UK) — destination and programme listings with trip booking across countries like Sri Lanka, Thailand, and Tanzania.

Simple Sign (simplesign.io) — E-signing platform with Swedish BankID.

PlacidWay (placidway.com) — Medical tourism SaaS — AI automation, Stripe integration, technical SEO.

MainFunder (mainfunder.se) — Investor platform — Sweden.

Great British Speakers (greatbritishspeakers.co.uk) — WordPress optimization — custom Person schema markup for talent profiles, plugin conflict resolution, and site performance work.

Also delivered custom WordPress plugin development, theme customization, and performance optimization across multiple additional client sites.
